

PANTERA project-A Pan European Technology Energy Research Approach towards synergies facilitation on smart grids

Together we can
make the difference

Dr. Venizelos Efthymiou

The earth is burning ...

- Although Europe is in the lead to combat climate change, its industry is shaking
- Winning a strong presence of the European Industry in delivering the required technologies is a must. How?
- Wider and broader participation in R&I and building on results achieved. Sharing results!

Can we find the mode of Working to achieve it? **We think we can !!!**
Today is a start.
We need you all the way...

- Global warming is not a joke ...
- Science has given its verdict ...
- Paris Agreement has set the world on truck to mitigate the effects and force the way through for the energy transition ...
- 1.5 degrees C is achievable but requires commitment from everybody round the globe ...
