

Round table 2: Teaming with ETIP SNET and BRIDGE in enhancing the evaluation process of projects in support of R&I priorities roadmap

Moderator:

Dr. Luciano Martini (RSE, Coordinator EERA JP on Smart Grids)

Invited contributors:

Ms. **Michela Marasco** (European Commission DG ENER)

Prof. **Nikos Hatziargyriou** (ICSS/NTUA)

National Technical
University of Athens

Michela Marasco works as Policy Officer in DG Energy, in the Unit Innovation, clean technologies and competitiveness, where she leads on fostering innovation in the areas of grids and energy systems. She is the EC representative on the Governing Boards and Executive Committees of key technology and innovation fora for smart energy networks, including the ETIP SNET and ISGAN. Michela is an expert in EU Funding Instruments and has long-standing experience in supporting innovation in multiple sectors.

Nikos Hatziargyriou is full professor in Power Systems at the National Technical University of Athens and he was Chair and CEO of the Hellenic Distribution Network Operator (HEDNO). He was chair and currently vice-chair of ETIP-SNET and co-chair of the BRIDGE R&I priorities Task Force. He has participated in more than 60 R&I projects and he is included in the 2016, 2017 and 2019 Thomson Reuters lists of top 1% most cited researchers.

Question #1

**Given the identified challenges, in which way
the newly formed
Task Force of BRIDGE “R&I priorities”
plans to contribute in quantitatively identifying
priorities utilising project results?**

Question #2

**How the Task Force of BRIDGE “R&I priorities”
can be effectively linked to the activities of the
ETIP SNET that generates the 10-year R&I
Roadmap and Implementation Plans?**

Your **R&I work** in project consortia is often governed by the objectives set at project concept when it is not yet clear how the main project outcomes can be transformed into key exploitable results useful for product evolution and success in the market. From your experience working in project consortia how important it is the following for raising the impact of the project outcomes?

Please rank from 1 star to 5 stars (most important)

In the initial phase of the project (e.g. within the first 6 months):

- **Make a market evaluation for positioning the key exploitable results of the project**
- **Develop/define suitable KPIs for the foreseen key exploitable results to be achieved**
- **Identify the innovation processes governing all different phases of the project evolution**

Question #3

What supportive role do you foresee for the EIRIE platform in the selection of R&I priorities and in enhancing the exploitation of projects' results?

Thank you
for your active participation!
